Ducal Global Allocation Fund, a Sub-Fund of Ducal Investment Fund

Class: R, (Accumulation) LU1241895272

This SICAV is managed by Crestbridge Management Company S.A.

Objectives and investment policy

The objective of the Fund is to generate income and long-term capital growth by investing globally in equity, equity related securities, debt and short term securities.

The Fund is an actively managed Fund. The Fund is not managed in reference to a certain benchmark. The benchmark of the Fund, the Euribor 1 Year rate + 2%, is used for performance comparison and performance fees purposes only and does not imply any investment constraint on the asset allocation of the Fund. Hence the holdings and performances can deviate significantly from the above mentioned benchmark.

The Fund invests mainly, directly or indirectly, in a diversified range of assets, including but not limited to equities or equity related securities, higher quality or lower quality debt securities without geographical, sectoral or size constraints. The Fund maintains a flexible approach to asset allocation and allocations may vary significantly. Depending on the global macro-economic situation, long and short positions may be used to vary exposure to different asset classes and markets. The Fund may also invest up to 25% of its net assets in lower quality debt securities. The Fund may also, from time to time, hold liquid assets up to 100 % of its assets. The Fund may invest its liquid assets directly in or through UCITS (undertakings for collective investment in transferrable securities) and/or other UCI (undertakings for collective investment), cash deposits and/or money-market instruments, within risk diversification limits.

The Fund will invest in securities that are generally considered as undervalued in the market. The Fund may invest up to 10% of its assets in convertible securities. Investments in other UCITS or other UCI are limited to 10% of the net assets of the Fund. The Fund may invest in derivative instruments for hedging or investment purposes. The Fund will not invest in distressed or defaulted securities, contingent convertible bonds, asset-backed securities or mortgage-backed securities and will not use securities financing transactions or total return swaps.

The reference currency of the Fund is EUR and currency exposure is flexibly managed.

This share class is an accumulating share class. Income received by the Fund will automatically be reinvested and the value reflected in the price of the share class.

Subscription and redemption of shares can be carried out on each Bank Business day before 16:00 CET.

Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

This indicator represents the annual historical volatility of the Fund over a 5-year period.

Risk Category 4 reflects moderate potential gains and/or losses for the portfolio. This is due to investments in equities and bonds on the worldwide market.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Credit risk: The Fund invests in bonds, cash or other money market instruments. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer. The risk of default is usually higher with bonds that are rated as sub-investment grade.

Interest rate risk: An increase in interest rates may cause the value of fixed-income securities held by the Fund to decline. Bond prices and yields have an inverse relationship, when the price of a bond falls the yield rises.

Financial, economic and political risks: Financial instruments are impacted by various factors, of which, without being exhaustive, the development of the financial market, the economic development of issuers who are themselves affected by the general world economic situation as well as economic and political conditions prevailing in each country.

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices. This can be the result of shocks of unprecedented intensity and severity such as but not limited to pandemics and natural disasters.
